

Dhruv Kumar

Email — +91 9153610767 — Portfolio — [LinkedIn](#) — [GitHub](#)

Summary

Software engineer with an AI & Data Science background, currently working as a Graduate Trainee Engineer at Siemens Technology & Services developing enterprise software in C#, Angular, and TypeScript. Experienced in building machine learning pipelines, computer vision systems, and backend services with Python. Passionate about scalable AI/ML systems and modern agentic AI engineering workflows.

Education

Ajeenkya DY Patil School of Engineering (under SPPU), Pune, India	Graduated: 2026
Bachelor of Engineering (B.E.) in Artificial Intelligence and Data Science	CGPA: 8.44
Holy Mission Sr. Sec. School, Muzaffarpur, Bihar, India	Completed: May 2022
Higher Secondary Certificate (10th & 12th Grade)	10th: 87% & 12th: 81%

Technical Skills

Languages: Python, C#, TypeScript, SQL
Web Development: Angular, Django, Flask, REST APIs, HTML, CSS
AI/ML: TensorFlow, Keras, PyTorch, OpenCV, Machine Learning, Computer Vision
Tools & Concepts: Git, DBMS, Object-Oriented Programming, Data Analysis

Experience

Siemens Technology & Services Pvt. Ltd.	<i>Chennai, India</i>
<i>Graduate Trainee Engineer</i>	<i>Aug 2026 – Present</i>
- Develop, debug, and maintain features across enterprise-scale physical security and access-control platforms using C#, Angular, and TypeScript. - Leverage agentic AI developer tools to accelerate codebase comprehension, analyze dependencies, and support software modernization initiatives.	
Scalefull Technologies Pvt. Ltd.	<i>Remote</i>
<i>ML Intern</i>	<i>Nov 2024 – Jan 2025</i>
Engineered a multi-stock LSTM model in TensorFlow/Keras for stock price forecasting using RSI, MACD, and Bollinger Bands; achieved 93% test accuracy on GOOGL and AMZN.	

Projects & Research

NeuroScan AI — AI-powered brain tumor detection tool

- Developed an end-to-end medical imaging web application using TensorFlow, Keras, and Streamlit to classify brain tumors from MRI scans, achieving 92.68% validation accuracy on Kaggle benchmark datasets.
- Built image preprocessing and CNN inference pipelines delivering real-time predictions with visual confidence scores and diagnostic suggestions.

Automated Answer Checker — AI-based evaluation of handwritten answer sheets

- Built an automated evaluation pipeline using OCR APIs and regex to extract, segment, and digitize handwritten student responses from PDF sheets.
- Implemented NLP semantic grading using Sentence-Transformers and cosine similarity against reference keys, generating automated report cards with visual analytics and MySQL storage.

Comparative Analysis of Plant Disease Detection System — research project

- Co-authored a published research paper proposing an enhanced Convolutional Neural Network (CNN) architecture for plant disease detection, achieving 95.26% classification accuracy.
- Optimized model performance and generalization through adaptive learning rates, k-fold cross-validation, and tailored preprocessing techniques.

Achievements/Certifications

- Topper – First Year Engineering: Ranked 2nd among all students in department.
- Subject Topper: Achieved top marks in Engineering Mathematics and Mechanics.
- GATE DSAI 2025 Qualified: Secured All India Rank 6259 in Data Science & Artificial Intelligence.
- 2nd Place – Inter-College Chess Tournament.
