Summary

AI & Data Science engineer with enterprise software experience at Siemens and hands-on AI/ML development in Python. Built systems for automated evaluation, NLP semantic scoring, and computer vision, with practical experience in C#, TypeScript, and Angular. Focused on AI evaluation, software quality, and reliable applied AI systems.

Education

Ajeenkya DY Patil School of Engineering (under SPPU), Pune, India	Graduated: 2026
Bachelor of Engineering (B.E.) in Artificial Intelligence and Data Science	CGPA: 8.44
Holy Mission Sr. Sec. School, Muzaffarpur, Bihar, India	Completed: May 2022
Higher Secondary Certificate (10th & 12th Grade)	10th: 87% — 12th: 81%

Technical Skills

Languages: Python, C#, TypeScript, SQL

AI/ML: Machine Learning, Deep Learning, Computer Vision, TensorFlow, Keras, PyTorch, OpenCV

Software & Web: Angular, Django, Flask, REST APIs, HTML, CSS

Engineering Tools: Git, DBMS, Object-Oriented Programming, Data Analysis, Testing

Experience

Siemens Technology & Services Pvt. Ltd.	<i>Chennai, India</i>
<i>Graduate Trainee Engineer</i>	<i>Aug 2026 – Present</i>
- Contribute to SiPass enterprise physical access-control software, developing and debugging features across enterprise codebases in C#, Angular, and TypeScript. - Maintain software quality through code reviews, component debugging, and system integration within an enterprise engineering environment. - Leverage agentic AI developer tools to accelerate codebase comprehension, dependency mapping, and software modernization workflows.	

Projects & Research

Automated Answer Checker — Automated Semantic Evaluation Pipeline

- Engineered an automated evaluation pipeline using OCR and regex to extract, segment, and validate handwritten student responses from PDF sheets.
- Implemented NLP semantic grading using Sentence-Transformers and cosine similarity to benchmark answers against reference keys with structured scoring rubrics.

NeuroScan AI — Brain Tumor Detection & MRI Classification

- Developed a convolutional neural network in TensorFlow/Keras to classify brain MRI scans, achieving 92.68% validation accuracy on Kaggle benchmark datasets.
- Built image preprocessing and inference pipelines delivering real-time predictions with visual confidence distributions.

Comparative Analysis of Plant Disease Detection System — Research Publication

- Co-authored published research proposing an enhanced CNN architecture for agricultural plant disease detection, achieving 95.26% classification accuracy.
- Optimized model generalization and validation performance using adaptive learning rates, k-fold cross-validation, and customized data augmentation.

Achievements/Certifications

- Topper — First Year Engineering: Ranked 2nd among all students in department.
- Subject Topper: Achieved top marks in Engineering Mathematics and Mechanics.
- GATE DSAI 2025 Qualified — Secured All India Rank 6259 in Data Science & Artificial Intelligence.
- 2nd Place — Inter-College Chess Tournament.
